

Malo-Lactic Chromatography (MLC) [1012005]

The simplest analytic to determine, qualitatively, the fermentation process of malic acid in wines by paper chromatography.

Includes

- 1 x 250 mL revealer [1012006]
- 50 strip papers [1012007]
- 1 petri boxes kit [1012008]
- 1 support [1012009]
- 1 bell [3026205]
- 1 bag of 10 Pasteur pipettes [6005009]

Characteristics

- qualitative analysis of the tartaric, malic and lactic ac.
- fast preparation
- easy to use
- without previous knowledge

- 100-150 determinations
- required time: 1-2 hours
